

MAKERSPACE Jam session!

What is sound? How does a musical instrument make sound?

Next week, our 1st grade students will be going to the Makerspace room during their music classes. Here, they will have an opportunity to design and build their own instrument using makerspace materials! We are encouraging students to think about items around the house that could be used as part of an instrument. We invite students to bring in any additional items for when they work in the Makerspace room. Students will begin making their instruments next week, 1/14.

Recommended materials include:

Small boxes
Soup cans
Rubber bands
Plastic lids/containers
Popsicle sticks
Spoons
Beads
Strings
Tissue boxes
toilet paper rolls

Thank you and please contact Ms. Ouellette for any questions.
